FOR MORE INFORMATION ON COMPETING AND HOW TO QUALIFY, PLEASE VISIT WWW.TRIATHLON.ORG/PARATRIATHLON
**BACKGROUND**

**WHO:** Paratriathlon events are for athletes with physical and visual impairments. See the ITU categories section (to the right) for more details.

**WHAT:** Sprint Distance Triathlon - 750m swim, 20km bike, 5km run.

**WHERE:** International or National events. Most Local Organising Committees will try to accommodate Paratriathlon races in a separate wave or event.

**WHY:** Paratriathlon is unique in the way that it fully integrates athletes with physical and visual impairments fully alongside their able bodied counterparts in the same event.

**WHEN:** Check www.triathlon.org and the website of your local triathlon association for events.

**QUALIFICATION:** To qualify to compete at the ITU World Paratriathlon Championships please contact your National Federation. As a guideline, athletes should be able to complete a Sprint distance triathlon in under 2 hours.

**CLASSIFICATION:** A Paratriathlete must be classified by an ITU International Classification Panel prior to an ITU Sanctioned event to determine eligibility for competition and to allocate a competition class. Classification will ensure that the competition is fair and equitable. A temporary classification can be assigned to Paratriathletes competing at an ITU event, where a formal classification process is not available. The ITU Paratriathlon Classification Rules and Regulations is available at www.triathlon.org

**PARALYMPICS**

“We are delighted the International Paralympic Committee has included Paratriathlon in the Rio 2016 Paralympic Games Programme. Now we are full members of the IPC, we will continue to work hard together to develop our classification process and paratriathlon events to deliver a memorable and inspirational race in Rio and beyond”.

-Sarah Springman, ITU Vice President
