member of the Olympic

Discussion Items:	Action Items and notes:
<u>1- Collaboration</u> ITA/World Triathlon	 Update on the collaboration between ITA and Worl Triathlon : ITA will replace CCES with whom we were working for many years. They will be in charge of the organization of the In-Competition and Out-of-Competition Tests, revision of the TDP and Risk Assessment, the Intelligence and Investigation (use of the REVEAL platform), the management of the Whereabouts of World Triathlon's RTP/TF support in the Education activities.
	 World Triathlon is still in charge of the Resu Management and the management of the TUE (wit the Medical Committee).
	 Agreed to have an update of the Anti-Dopin Activities every 3 months.
2- Joint position Statement of the International Federation of Sports (FIMS) Medicine and European Federation of Sports Medicine Associations (EFSMA)	 Continuous request from National Federations (5) t have rules to follow.
	 About transgender: request to the IOC Medica Committee a revision of the rule in place regardin transgender. Lot of International Federations ar asking for this review. Probably after the Winter Olympic Games.
	 Other International Federations have already adopte the limit of 5 for testosterone for the transgender t compete in the women categorie.Should we move t 5 as well?
	 The question is about doping (performance enhancing) and a fair competition for the wome athletes competing. The transgenders must perform the TUE to the WT TUE com.
World Triathlon	

	• Proposition to have a monitored period, giving us research and time to monitor the situation in our own population of Triathlon.
	• The question: should the limite be 10 or 5 for testosterone? The use of 5nmol/L in transwomen is a justificable threshold based on the best available scientific evidence.
	 WADA ttransgender Guidelines
<u>3- Perform the medical</u> race workshop for the Race Medical Director	• Abu Dhabi is a good place to perform this workshop, as more doctors from National Federations are present. Could it be in collaboration with World Athletics.
	• Also a good opportunity to have a WT med com meeting in person during this event (if the covid situation allows us to meet in person).
<u>4- Heat conditions and</u> Long Distance Events	• Rule for the Long distance : data about the IRONMAN competition from WU, athletes in the medical tent, in comparison with different environments of the competitions.
	• Safety and long distance races: having rules to compete in the heat for our athletes (as we now do for the Olympics distance and not for the Long Distance).
	 Research is conducted by the Washington University (discussion to have a MOU with them).
5- Covid updates and competitions	 Round Table about the covid situation in each country and the competitions calendar and the conditions.

Next meeting, 23th of February, 2022 at 9pm CET.

Minutes by Jeanne Courbe, Staff liaison.
